

1 Abstract of the Disclosure

2

3 The present invention is based on a suction device for a power tool (10a, 10b), in
4 particular for a drilling and/or chipping tool, with at least one dust container (12a
5 – 12c) and at least one suction head (14a – 14c) to be placed on a work piece
6 (16a, 16b).

7

8 It is proposed that the dust container (12a – 12c) be integrated in the suction
9 head (14a – 14c).
